

# E-Waste Management

On 19th September 2025, Punjab Public Senior Secondary School, Brahaman Majra, organized an awareness programme on E-Waste Management. The purpose of the event was to educate students about the growing problem of electronic waste and its harmful effects on the environment.

Teachers explained how unused mobile phones, computers, televisions, and other electronic items contribute to pollution if not disposed of properly. Students were encouraged to recycle e-waste, donate old devices, and avoid throwing them with regular garbage.

The programme also highlighted the importance of reduce, reuse, and recycle to minimize electronic waste. Students took a pledge to spread awareness in their families and community about safe e-waste disposal.

The event was highly successful and inspired everyone to become responsible digital citizens.
