

Save Energy

Awareness Programme "SAVE ENERGY"

Punjab Public Senior Secondary School, Brahman Majra, organized an event on the theme “Save Energy” on 17th September 2025. The event was aimed at spreading awareness among students about the importance of conserving energy for a sustainable future.

All the four houses of our school participated with great enthusiasm and activeness. Various activities such as speeches, skits, poster-making, and quiz competitions were held. Students highlighted the need to switch off lights and fans when not in use, adopt renewable sources of energy, and use energy-efficient appliances.

The event not only encouraged students to contribute towards energy conservation but also instilled in them a sense of responsibility towards the environment. Our Principal, Mr. Arun Kumar Katoch, appreciated the efforts of the participants and motivated everyone to practice energy-saving habits in daily life.

The program concluded with a pledge taken by all students and staff to “Save Energy, Save Future.”
